

Plots from Cinderella — Linux only

1. Start Cinderella
2. Create desired construction.
3. Save your construction as a .cdy file: e.g., `Circumcenter.cdy`
4. Using **File / Export Graphics to / Portable Network Graphics (*.png)**, save your construction as a .PNG file
5. Import the .PNG file into your L^AT_EX file:

```
\includegraphics[width=2in]{Circumcenter} % Adjust width as desired
```

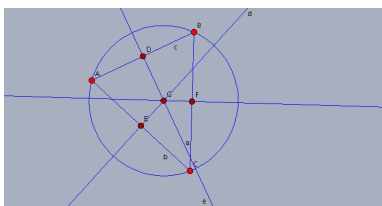

Figure 1: A drawing produced by *Cinderella*, saved as a ,PNG

Note: Cinderella constructions have a much nicer appearance when saved as a .PDF graphics, however such files cannot be annotated with Ipe as shown below.

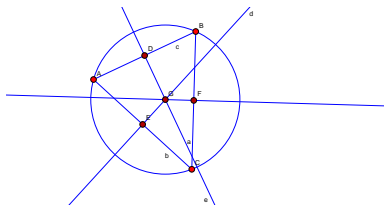

Figure 2: A drawing produced by *Cinderella*, saved as a .PDF
