

Plots from Maple — Windows version

1. Start Maple 11
2. Create desired plot:

```
plot3d(sin(x)*exp(-y), x=0..2*Pi, y=0..1, axes=boxed);
```
3. Right click on plot, choose Export/Encapsulated Postscript (EPS)
4. Save in some folder choosing a name (without .EPS extension)
5. In the lab, drag this file to the magic icon, which produces a .PNG file of the same name
6. Import the .PNG file in your \LaTeX file:

```
\includegraphics[width=2.5in]{3dplot} % Adjust width as desired
```
