

Elements of Logic

Table of Contents

Chapter One: Informal Logic

1.1. Arguments

Describing Arguments

1.2. Premises and Conclusions

1.2.1. Standard Form Argument Problems

1.3. Questions and Arguments

1.3.1. Standard Form Argument Problems

1.4. Combo Sentences

1.4.1. Combo Sentence Problems

1.5. Chain Arguments and Argument Maps

1.6. Argument Mapping Principles

1.6.1. Argument Mapping Problems

Evaluating Arguments

1.7. Convincing Argument: Two Factors

1.7.1. Truth and Validity Problems

1.8. Validity Counterexamples

1.8.1. Validity Counterexample Problems

1.9. Meaning, Truth, and Validity

1.9.1. Meaning, Truth, and Validity Problems

1.10. Criticizing Arguments

1.10.1. Argument Evaluation Problems

1.11. Criticizing Chain Arguments

1.11.1. Chain Argument and Validity Problems

1.12. Unstated Premises

1.13.1. Unstated Premise Problems

1.13. The Trouble with the Informal Test

Chapter Two: Sentence Logic: ‘And,’ ‘Or,’ and ‘Not’

2.1. Formal Logic: The Philosophy

English Language, Formal Language

2.2. Formal Language, Informally

2.2.1. Translation Problems

2.3. Translation Keys

2.3.1. Translation Problems: Translation Keys

2.4. English Form Phrases: Translation Variations

2.4.1. Translation Problems

2.5. Inversion: An English Oddity

2.5.1. Translation Problems

2.6. Translation Philosophy: The X-Ray Method

2.6.1. Translation Problems

2.7. Constructing Formal Sentences: Atoms and Molecules

2.7.1. Translation and Construction Problems

2.8. Construction Trees Revisited (and Reversed)

2.8.1. Construction and Translation Problems

2.9. Main Form Phrase, Main Connective

2.9.1. Translation and Construction Problems

2.10. Scope

2.10.1. Translation Problems

Formal Semantics: Truth Tables

2.11. Formal Semantics: Introduction

2.12. Formal Semantics: Sentence Letters

2.12.1. Semantic Problems: Bad Truth Tables

2.13. Formal Semantics: Negations

2.13.1. Translation and Truth Table Problem

2.14. Formal Semantics: Conjunctions

2.14.1. Translation and Truth Table Completion Problem

2.15. Formal Semantics: Disjunctions

2.15.1. Semantic Problems: Truth Table Completion

2.16. Construction Meets Semantics: Building Sentences, Building Truth Tables

2.16.1. Semantics and Construction Problems

- 2.17. Semantic Concepts
 - 2.17.1. Semantic Problems: Tautology, Contradiction, and Logical Equivalence
- 2.18. Truth Tables and Validity
 - 2.18.1. Semantic Problems: Validity
- 2.19. Features of Validity: Limit-Case Arguments
 - 2.19.1. Features of Validity: Problems
- 2.20. Validity and Inconsistency
 - 2.20.1. Semantic Problems: Validity, Consistency, and Counterexample Sets

Formal Semantics: Truth Trees

- 2.21. The Semantic Test of Validity: An Indirect Approach
 - 2.21.1. Indirect Test of Validity: Simple Problems
- 2.22. Old Rules, New Notation
 - 2.22.1. Semantic Problems: Valuations and Vertical Lines
- 2.23. Truth Trees
 - 2.23.1. Truth Trees and Validity: Simple Problems
- 2.24. Truth Tree Restrictions
 - 2.24.1. Truth Tree Validity Problems
- 2.25. Truth Trees: Tautologies, Contradictions, and Logical Equivalence
 - 2.25.1. Truth Tree Problems: Tautology, Contradiction, and Logical Equivalence

Formal Semantics: Further Issues

- 2.26. Valuation and Anti-Valuation Sentences
 - 2.26.1. Valuation and Anti-Valuation Sentence Problems
- 2.27. Expressive Adequacy and Normal Forms
 - 2.27.1. Normal Form Problems
- 2.28. Equivalence, Transformation, and the 3D Method
 - 2.28.1. Transformation and Simplification Problems
- 2.29. Analytic Trees and Sentence Analysis: Truth Trees Without Truth (and without Trees)
 - 2.29.1. Problems

- 2.30. Expressive Adequacy: Further Languages
 - 2.30.1. Expressive Adequacy Problems
- 2.31. Logical Duality
 - 2.31.1. Logical Duality Problems
- 2.32. More Duals
 - 2.32.1. More Duality Problems

Proofs and Deductions

- 2.33. Fundamentals of Deduction
 - 2.33.1. Deduction Problem
- 2.34. Deduction: Inference Rules
 - 2.34.1. Inference Rule Problem
- 2.35. Deduction Strategy
 - 2.35.1. Deduction Problems
- 2.36. Fundamentals of Indirect Deduction
 - 2.36.1. Indirect Deduction Problems
- 2.37. Indirect Deduction Strategy
 - 2.37.1. Indirect Deduction Problems
- 2.38. Proofs, Theorems, and Inconsistency
 - 2.38.1. Proof Problems
- 2.39. Proof Strategy [The Deductive Challenge]
 - 2.39.1. Proof Problems
- 2.40. Derived Rules of Inference
 - 2.40.1. Derived Rule Problems

Chapter Three: Sentence Logic: ‘If’ (And More)

English Language, Formal Language

- 3.1. Introduction: Conditionals
 - 3.1.1. Conditional Translation: Simple Problems
- 3.2. Conditional Clues and Complications
 - 3.2.1. Conditional Translation Problems

Formal Semantics: Truth Tables and Truth Trees

- 3.3. Conditional Semantics
 - 3.3.1. Conditional Semantic Problems: Logical Equivalence
- 3.4. Conditional Semantics Revisited: Converse, Contrapositive, and Biconditional
- 3.5. Truth Trees: Conditionals and Biconditionals
 - 3.5.1. Semantic Problems: Tautology, Contradiction, Logical Equivalence, and Validity
- 3.6. Conditionals and Validity
 - 3.6.1. Leading Principle and Validity Problems
- 3.7. Conditional Semantics: Puzzles and Peculiarities

Formal Semantics: Further Issues

- 3.8. Expressive Adequacy Revisited: Conditional and Biconditional Languages
 - 3.8.1. Expressive Power Problems
- 3.9. Further Formal Languages
 - 3.9.1. Expressive Power Problems
- 3.10. Duality Revisited
 - 3.10.1. Duality Problems
- 3.11. Principles of Expressive Adequacy [Post]
 - 3.11.1. Expressive Power Problems
- 3.12. Knight-Knave Puzzles (and How to Solve Them)
 - 3.12.1. Knight-Knave Problems

Proofs and Deductions

- 3.13. Conditional Deduction
 - 3.13.1. Conditional Deduction Problems
- 3.14. Conditionals and Biconditionals: Deductive Rules
 - 3.14.1. Conditional and Biconditional Deduction Problems
- 3.15. Alternative Systems of Rules and Deductions
 - 3.15.1. Derived Rule and Deduction Problems

- 3.17. Deductions in Different Logic Languages
 - 3.17.1. Alternative Connectives: Deduction Problems
- 3.18. Conditionals, Validity, and Logical Equivalence
 - 3.18.1. Logical Equivalence Problems

Chapter Four: Syllogisms

- 4.1. Logical Form (Again): Term Logic
- 4.2. Categorical Sentences
 - 4.2.1. Categorical Sentence Problems
- 4.3. The Square of Opposition
 - 4.3.1. Categorical Sentence Problems
- 4.4. Semantics for Categorical Sentences
 - 4.4.1. Categorical Sentence Problems
- 4.5. Categorical Syllogisms
 - 4.5.1. Syllogism Problems
- 4.6. Natural Deduction for Categorical Syllogism
 - 4.6.1. Syllogistic Deduction Problems
- 4.7. Indirect Deduction and Categorical Syllogism
 - 4.7.1. Indirect Deduction Problems
- 4.8. Syllogistic Deduction Extended
 - 4.8.1. Extended Deduction Problems
- 4.9. Names and Syllogistic Deductions
 - 4.9.1. Extended Deduction Problems
- 4.10. The Limits of Syllogistic Logic

Chapter Five: Names, Predicates, and Quantifiers

- 5.1. Introduction: More Logical Form

Names and Predicates: Translation and Semantics

- 5.2. Names and Predicates: English Language, Formal Language
 - 5.2.1. Names and Predicates: Construction and Translation Problems
- 5.3. Names and Predicates: Formal Semantics
 - 5.3.1. Semantic Problems: Names, Predicate, and Models

Quantifiers

5.4. Quantifiers and Variables

5.4.1. Name, Predicate, and Quantifier Translation: Simple Problems

5.5. Quantified Predicate Logic: Three Formal Languages

Quantified Basic Sentences

5.6. A Modest Deployment of Quantifiers: Quantified Basic Sentences

5.7. Translation Variations: Simple Universal and Existential Sentences

5.8. Quantifier Semantics: Simple Cases

5.7.1. Quantifier Semantics Problems

5.9. Truth Trees Revisited: Quantifier Rules

5.8.1. Truth Tree Problems

Pure Sentences

5.10. Quantified Predicate Logic: Pure Sentences and Formulas

5.10.1. Problems

5.11. Construction Revisited: Quantifiers, Variables, and Binding

5.11.1. Quantifier Construction Problems

5.12. Translation Variations: Existential Sentences

5.12.1. Translation Problems: Existential Sentences

5.13. Translation Variations: Universal Sentences

5.13.1. Translation Problems: Universal Sentences

5.14. Translation Complications: Universal Sentences Revisited

5.14.1. Translation Problems: Universal and Existential Sentences

5.15. Quantifier Semantics Revisited: Instances

5.15.1. Quantifier Semantics Problems: Instances

5.16. Truth Trees Revisited

5.16.1. Truth Tree Problems

5.17. Logical Truths, Contradictions, and Equivalence Problems

5.18. Sentence Logic Revisited: Sentence Expansions

5.18.1. Sentence Expansion Problems

Monadic Quantified Logic: Full Formal Language

- 5.19. Quantified Predicate Logic: Construction
 - 5.19.1. Problems
- 5.20. Instances Re-Revisited
 - 5.20.1. Problems
- 5.21. Pure Sentences and Prenex Normal Form: Rules of Passage and Distribution
 - 5.21.1. Normal Form Problems
- 5.22. Sentence Logic Revisited: Sentence Expansions
 - 5.22.1. Expansion Problems

Proofs and Deductions

- 5.23. Quantifiers: Rules of Deduction
 - 5.23.1. Quantifier Deduction Problems
- 5.24. Quantifiers: Proofs and Deductions
 - 5.24.1. Proof and Deduction Problems

Chapter Six: Names, Predicates, and Quantifiers

- 6.1. Introduction: More Logical Form

Relations: Translation and Semantics

- 6.2. Relations: English Language, Formal Language
 - 6.2.1. Relation Translation Problems
- 6.3. Relations: Formal Semantics
 - 6.3.1. Semantic Problems: Models and Relations
- 6.4. Relations and Quantifiers
- 6.5. Features of Relations
- 6.6. Truth Trees
- 6.7. Decidability

Relations: Proofs and Deductions

- 6.8. Inference Rules Revised
- 6.9. Logical Truths, Contradictions, and Equivalence
- 6.10. Completeness and Decidability

Formal Language Extended: Identity and Relations

- 6.11. Identity: Construction and Translation
- 6.12. Identity: Translation and Semantics
- 6.13. Definite Descriptions
- 6.14. Function Letters: Translation and Semantics
- 6.15. Proofs and Deductions
- 6.16. Completeness and Decidability Revisited

Chapter Seven: Pragmatics

- 7.1. Pragmatics
- 7.2. Types of Communication
 - 7.2.1. Pragmatics Problems: Types of Communication
- 7.3. Conversational Maxims
 - 7.3.1. Maxim Problems
- 7.4. Peculiarities of Validity: A Pragmatic Approach
- 7.5. Presuppositions
- 7.6. Presuppositions of Questions and Commands
 - 7.6.1. Presupposition Problems
- 7.7. Questions: More Pragmatic Factors
 - 7.7.1. “Why?” Question Problems
- 7.8. Pragmatic Fallacies
 - 7.8.1. Pragmatic Fallacy Problems
